Easy

Averages and range

A. Find all four averages

- 1 Ordered: 2, 4, 6, 9, 9
Mean = 6, Median = 6, Mode = 9, Range = 7
- 2 Ordered: 10, 11, 12, 14, 15, 18
Mean = 13.33, Median = 13, Mode = 10, 11, 12, 14, 15, 18, Range = 8
- 3 Ordered: 2, 3, 5, 6, 8, 8, 8
Mean = 5.71, Median = 6, Mode = 8, Range = 6

B. Frequency table

- 4 Total goals = $0 \times 2 + 1 \times 4 + 2 \times 3 + 3 \times 1 = 13$; mean = $13 \div 10 = 1.3$
- 5 1 goal (it happens 4 times)

C. Problems

- 6 Total = $5 \times 8 = 40$; $5 + 9 + 10 + 7 = 31$; fifth = 9
- 7 Range = $26 - 19 = 7$ °C. The temperature varied by 7 degrees over the week.
- 8 Class A – a smaller range means the marks are closer together.

★ Challenge

- 9 e.g. 4, 6, 6, 6, 8 (mean = $30 \div 5 = 6$, range = 4)
- 10 A few very expensive houses pull the mean up. The median is not affected by extreme values.
