

Mean, Median, Mode & Range

WorksheetHub AI
Mathematics · Grade 7

Unit 4 · Data & Probability

Easy

Averages and range

Name: _____

Date: _____

Score: / 10

Remember

Always put the data **in order** before finding the median. If there are two middle values, the median is halfway between them.

MEAN

add all, divide
by how many

MEDIAN

the middle value
(in order)

MODE

the most
common value

RANGE

biggest – smallest
(how spread out)

Worked example: 3, 7, 5, 7, 8

Ordered: 3, 5, 7, 7, 8 | Mean = $30 \div 5 = 6$ | Median = 7 | Mode = 7 | Range = $8 - 3 = 5$

A. Find all four averages

- Find the mean, median, mode and range of: **4, 9, 6, 9, 2**
Answer:
- Find the mean, median, mode and range of: **12, 15, 11, 18, 14, 10**
Answer:
- Find the mean, median, mode and range of: **3, 8, 8, 5, 8, 6, 2**
Answer:

B. Frequency table

- A team's goals in 10 matches:

Goals	0	1	2	3
Matches	2	4	3	1

Find the mean number of goals.

Answer:

- 5 Which number of goals is the mode in the table?

Answer:

C. Problems

- 6 The mean of five numbers is 8. Four of them are 5, 9, 10 and 7. Find the fifth number.

Answer:

- 7 Daily temperatures ($^{\circ}\text{C}$): 21, 24, 19, 26, 22, 24, 20. Find the range and say what it tells you.

Answer:

- 8 Class A has a mean mark of 62 and range 10. Class B has a mean mark of 62 and range 40. Which class is more consistent? Why?

Answer:

★ Challenge

- 9 Five numbers have a mode of 6, a median of 6, a mean of 6 and a range of 4. Find a possible set.

Answer:

- 10 Why might the median be a better 'average' than the mean for house prices?

Answer:
