Easy

Number sets & types of number

Name: _____

Date: _____

Score: / 25

Remember

Even numbers end in 0, 2, 4, 6, 8. **Odd** numbers end in 1, 3, 5, 7, 9.

Prime = exactly **2 factors** (1 and itself). **Composite** = **more than 2 factors**. The number **1** is neither.

Triangular numbers: 1, 3, 6, 10, 15, 21... (add 1, then 2, then 3, then 4...)

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50

Dark blue = PRIME · Light blue = COMPOSITE · Grey = 1 (neither)

Triangular numbers: the dots make a triangle

Quick test

Is it prime? Try dividing by 2, 3, 5, 7. If none divide exactly, it is prime (for numbers under 100).

A. Odd or even?

1 Is **37** odd or even?

Answer:

2 Is **128** odd or even?

Answer:

3 Is **405** odd or even?
Answer:

4 Is **66** odd or even?
Answer:

5 Is **1001** odd or even?
Answer:

6 Is **3240** odd or even?
Answer:

B. Prime, composite or neither?

7 **1**
Answer:

8 **2**
Answer:

9 **9**
Answer:

10 **13**
Answer:

11 **21**
Answer:

12 **29**
Answer:

13 **35**
Answer:

14 **51**
Answer:

15 **53**
Answer:

16 **91**
Answer:

C. Triangular numbers

17 Write the first 8 triangular numbers.
Answer:

18 Which of these are triangular? 21, 24, 36, 40, 45, 55
Answer:

19 What is the 10th triangular number? (Hint: add $1+2+3+\dots+10$)
Answer:

D. Problem solving

- 20 List all the prime numbers between 20 and 50.
Answer:
- 21 Write down all the factors of 36. Is 36 prime or composite?
Answer:
- 22 2 is the only even prime number. Explain why no other even number can be prime.
Answer:

★ Challenge

- 23 I am a prime number between 30 and 40. The digits of my number add up to 4. What number am I?
Answer:
- 24 Write 20 as the sum of two different prime numbers in two ways.
Answer:
- 25 Find a number that is both a triangular number and a square number, other than 1.
Answer:
