Remember

Speed tells you how far you go in one hour (km/h) or one second (m/s). Keep the units matching: km with hours, m with seconds.

To change minutes to hours, divide by 60: 45 min = 0.75 h. To change 0.25 h to minutes, multiply by 60: = 15 min.

Cover what you want to find

Speed

$$S = D \div T$$

Distance

$$D = S \times T$$

Time

$$T = D \div S$$
